Press Release

Vi Dimensions Signs Strategic Cooperation Agreement with iSSTech at the MOU Signing Ceremony by IMDA held during the Smart China Expo, Chongqing – 22nd & 23rd August 2018

2018 年中国国际智能产业博览会重大项目集中签约活动 (2018 Smart China Expo Major Projects Centralized MoU Signing)

Singapore / Chongqing, 25th August 2018 – The first Smart China Expo 2018 was held at the Chongqing International Expo Center, China. During the signing ceremony for major projects held on the first day of the Smart China Expo, Vi Dimensions along with 2 other Singapore companies signed a cooperation agreement for the “China-Singapore Digital City Industry Alliance”. Twenty guests from national ministries, foreign governments, brother provinces and cities, well-known enterprises and the Chongqing Municipal Government witnessed the signing of the project.

Under the Sino-Singapore (Chongqing) Interconnection Strategic Demonstration Project, which promotes the development of the digital economy in both countries, another Strategic Cooperation Agreement was signed between Vi Dimensions Pte Ltd and 重庆两江新区软通智慧科技有限公司 (iSSTech). The MOU signing was witnessed by the Deputy Secretary General of Chongqing Municipal People's Government and Chief Executive Officer of Singapore Information and Communication Media Development (IMDA).

The agreement guides the commitment between both companies to work on developing opportunities for smart cities and industrial cities to boost city surveillance needs for automation and intelligent detection of unusual and abnormal events as and when it happens.

About iSSTech

iSSTech a company of iSoftstone, is China's leading smart city technology services providers and operators. The company focus on the use of emerging technologies such as big data, cloud computing,

VI DIMENSIONS

Internet of Things, artificial intelligence to precipitate urban data, provides integrated design, construction and operation services for digital and intelligent cities throughout China.

About Vi Dimensions

Vi Dimensions was founded in 2015 with the simple idea that video analytics can be done in a much better and efficient way with the goal to revolutionize safe city surveillance harnessing thousands of cameras.

Vi Dimension's vision and mission are to revolutionize the surveillance industry in terms of providing a better way of monitoring CCTV cameras to detect abnormal events and behaviours which could lead to improvements in safety and security throughout the world.
